

Real Estate Lead Generation Campaign

**Within 6 months,
a 70X ROAS in real
estate transactions
was attributed,
resulting in millions
of dollars in revenue.**

Objective

Generate quality leads for a luxury real estate firm's sales team.

Challenge

Identify an audience consisting of "the 1% of the 1%" located in multiple markets on the Eastern Seaboard who are in market to purchase luxury real estate near Charleston, SC.

Audience Insights

This audience consumes content related to sports and finance and exhibits behaviors related to green living and luxury brand shopping. Prospective buyers reside in South Carolina, North Carolina, and the Northeastern states.

Strategy

Use online and offline data to build a custom audience to serve contextual display, pre-roll video, and native ads to prospective buyers on multiple channels and across all their devices. Retarget this audience with messaging to encourage them to return to the site to execute a search for property listings. As they continue to navigate the real estate firm's site, serve ads with specific calls to action, ultimately directing buyers to a lead generation page to complete a form fill for an agent to contact them.
